

Health & Safety policy

My beliefs

I believe all injuries and work related illnesses can and must be prevented.

I believe management is accountable for Health & Safety performance, and business performance is only a consequence of H&S performance.

I believe systematic hazard identification and risk analysis can and must be performed in all activities of the company.

My stakeholders

I understand permanent communication, involvement and training of all employees are essential in H&S excellence.

I consider Employee representatives as my partners in the pursuit of H&S performance.

I will look after contractors as after my own employees and will make sure all H&S rules and principles are fully applied to them.

My commitments

I understand I am the first actor of my own H&S and commit to abide by H&S rules at all times.

I commit to look after my colleagues, warn and help them stay under good H&S practice, and stop any ongoing work if conditions are unsafe.

I commit to enforce execution of H&S rules on my teams, and apply the necessary discipline to obtain the results.

My actions

I will abide by all Golden Rules and make sure everyone does so around me.

I will implement Fatality Prevention Standards in my unit and check my performance against third party audit.

I understand H&S starts with order and house-keeping and will implement 5S in my entire unit.

I will develop shared vigilance and implement Safety Stewards in all teams and shifts.

A. Kochuparampil
CEO ArcelorMittal Europe - Long Products
